Profile

I am a final year Informatics Engineering student at the University of Minho. I enjoy learning new technologies and building software that solves real problems. My interests include software engineering, cybersecurity, network engineering and continuous technical improvement. Throughout my academic journey, I've worked on various projects that have helped me develop strong problem-solving skills and a deep understanding of modern software development practices. I believe in continuous learning and always strive to improve my technical abilities.

Education

University of Minho — Informatics Engineering

2026 — Present Average: 14/20

Skills

Programming Languages: Java, Python, Haskell, C

Web Development: HTML, CSS, Vue.js, JavaScript, TypeScript

Tools & Technologies: Git, GitHub, VSCode, Linux

Databases: PostgreSQL, MySQL, MariaDB

Projects

Simple Distributed System — Java, TCP Sockets, Multithreading • Distributed system registering products from stores with query capabilities

Restaurant Chain Software System — Java, PlantUML, MariaDB • Software system for restaurant chain management

Rover-Space Base Communication — Java, TCP/UDP Sockets, JavaScript • Real-time monitoring of space rovers with mission sending and reporting

AirBnB Impact Website — Vue.js, TypeScript, CSS • Website filtering CSV data to graphs and flashcards with export

Portfolio Website — Vue.js, TypeScript, TailwindCSS • Modern responsive personal portfolio website

Streaming Platform — Java, PlantUML, Docker • Spotify-like streaming platform application

Hobbies & Interests

Sports (football, tennis, ping-pong, orienteering), gym (regular training, discipline), gaming (Resident Evil, CS2, LoL, Civilization, R6, TFT), and movies/TV (Better Call Saul, Breaking Bad, The Boys, Arcane).

Extracurricular Experience

Marketing & Communication Collaborator — CESIUM (UMinho)

Beyond the keyboard, I help bridge the gap between our engineering community and the public. My time at CESIUM has taught me how to communicate technical ideas clearly and how to coordinate with a team to hit deadlines—skills I believe are vital for a team work environment.

Why Accenture?

I am looking for a summer internship where I can be challenged by real-world complexity. Accenture's reputation for "delivering on the promise of technology" aligns perfectly with my desire to build software that actually matters. I am particularly interested in the Braga office's innovative culture, and I am eager to learn from Accenture's world-class mentors while contributing my skills in Java and Web Development to your current projects.
